

#2 Stepping Forward

In the center write what your [Leadership?] role is related to a specific current problem you have identified.

In the next layer, write what the tasks are that you think you need to take to help solve the problem.

In the outermost layer, write what supports you will need to be able to carry out your tasks.

Just outside of the circles, write what resources are needed to supply the supports you will need to be able to carry out your tasks.
