

I think we should do \mathcal{X} .

I believe that \mathcal{X} is the best choice at this time.

What leads me to think this is \mathcal{Y} .

I came to this conclusion after seeing \mathcal{Y} .

Say more about your view. What are you seeing?

Can you give me an example?

Help me see this through your lens.

- What am I missing?
- Help me find the flaws in how I'm looking at this situation.
- What are some unintended consequences of this decision?
- Let's pressure-test this.
